EDUCATION

Delhi Technological University (DTU)

B.Tech. in Computer Science and Engineering

New Delhi, India

2022 – 2026

Relevant Courses: Artificial Intelligence, Machine Learning, DBMS, Operating Systems, Software Engineering

EXPERIENCE

Accenture

Software Intern

Gurugram, Haryana

Dec 2025 – May 2026

- Analyzed **200+** ServiceNow ITSM tickets on an international client account, identifying **4** recurring failure patterns driving ~**55%** of ticket volume; documented findings in a triage report for the account team.
- Completed Accenture technical training in **Agentic AI, RAG, LangChain, AWS, and Azure**; earned **P3** Accenture's best intern-level MyCompetency rating.

DGFT, Ministry of Commerce and Industry

AI Intern

New Delhi, Delhi

Jun 2025 – Jul 2025

- Built and deployed a RAG chatbot indexing **100+** DGFT policy documents (**2K** text chunks) across **10+** policy categories; replaced a legacy keyword bot, achieving **75–85%** retrieval@3 on an internal query benchmark.
- Reduced user effort to discover relevant policies and knowledge by **78%** via self-service conversational support, and cut hallucinated or non-DGFT responses by nearly **90%** through AI guardrails and secure session handling.
- Iterated across **12+** prompt-tuning cycles and **16+** retrieval configurations (chunk size, top-k, reranker); tracked accuracy on a **100-question** internal eval set, improving policy-aligned answer rate from ~**54%** → **81%**.

DIPR, DRDO

Research Intern

New Delhi, Delhi

Jul 2024 – Aug 2024

- Designed a multimodal deception-detection pipeline on ~**1K** labeled samples: linguistic model (**DistilBERT** on Faster-Whisper transcripts) and acoustic model (**librosa** MFCC, pitch, energy), with probability outputs fused via a **Random Forest** ensemble.
- Linguistic model achieved **74%** accuracy and acoustic model **68%** individually; Random Forest late-fusion ensemble reached **81%** accuracy - a ~**7 percentage-point** lift, showing text and voice modalities carry complementary deception signals.
- Built reusable preprocessing modules for transcript normalization, audio segmentation (**5s** windows), and feature extraction; cut per-experiment setup time from ~**60 min** → ~**10 min** and standardized comparison across model variants.

PROJECTS

SafeSphere - Website | Python, FastAPI, PostgreSQL, Celery, Redis, LangChain, Neon, Clerk, AWS S3, React

- Architected production-grade FastAPI backend (**MVC + Service + Repository**) for FIR registration across **7 case types**, SOS emergency reporting with geospatial GeoJSON caching, and crime search — persisted via PostgreSQL/SQLAlchemy with **AWS S3** evidence storage and **Clerk JWT** auth (JWKS + auto-sync).
- Built a **RAG-based legal assistant** (LangChain + ChromaDB + **all-MiniLM-L6-v2** + **Mistral-Nemo-12B**) with inference offloaded to **Celery/Redis** workers using persistent RAG-chain caching, keeping API latency non-blocking under concurrent load.

MarketScout - Website | Python, FastAPI, Next.js, LangGraph, MCP, MongoDB, TypeScript

- Engineered a market intelligence platform (FastAPI + Next.js) with a **4-node LangGraph** reflection workflow (find-gaps → fill-gaps → merge → route) across **6 specialized analysis agents** (competitive, barrier, market-gap, sales-forecast, segmentation, industry); generates a ~**15-page report** in ~**4 min** — a **6× speedup** over baseline sequential-LLM implementation.
- Integrated **4 MCP tool servers** spanning **7+ data sources** (Google Search/News/Shopping/Trends, Reddit, YouTube, web scraper) with retry/backoff and rate-limit handling; achieved **74% real-data utilisation** in generated reports across **20 evaluated runs**.
- Implemented context-aware gap-driven routing with **2 reflection iterations** and citation tracking across agents; reduced hallucinated claims from **22%** → **9%** on a **20-report** benchmark, and cut redundant API calls by **35%** via response caching.

SKILLS

Languages

Python, SQL, TypeScript, JavaScript, C, C++

AI & LLMs

LangChain, LangGraph, RAG, Agentic AI, MCP, Prompt Engineering, PyTorch

Backend & APIs

REST APIs, WebSockets, JWT, PostgreSQL, MongoDB, ChromaDB, Redis

Cloud & DevOps

AWS (S3, EC2), Docker, GitHub Actions CI/CD, Linux

Developer Tools

Git, VS Code, Postman, Neon, Odysseus

Specializations

LLD System Design, Database Architecture, API Design, Agent Orchestration

ACHIEVEMENTS & CERTIFICATIONS

- Solved **400+** DSA problems across platforms; achieved a **1600+** LeetCode rating.
- Certified in Agentic AI, AWS, API Security, and Prompt Engineering.
